PROFESSIONAL SUMMARY

I am a Computer Science student who enjoys building real-world software and continuously learning new technologies. I am passionate about web development, problem-solving, and creating solutions that can make everyday tasks easier. Through my projects and academic work, I strive to improve both my technical skills and my ability to turn ideas into meaningful applications.

PROFESSIONAL EXPERIENCE

Project Manager Intern — BAIUST Computer Club(BCC)
Jul 2025 to Dec 2025

- Led a software development team of 5 members under BCC internship program.
- Managed Git workflows, feature planning, and delivery timelines.

Python Django Instructor — BAIUST Computer Club(BCC)
March 2026 to Present

- Python & Django Instruction: Serve as an Instructor for the BAIUST Computer Club, lead
build the foundational programming skills students need before transitioning into our active Django training.
- Internship Pipeline Management: Benchmark and prepare a cohort of 19 students across m
master core prerequisite concepts required for our ongoing Django Internship Program.
- Curriculum Alignment: Design and facilitate targeted coding sessions that directly bridge basic Python syntax with the web development frameworks and advanced learning modules we are currently exploring.

PROJECTS

Campus Loop (2025)

Tech: HTML, Tailwind, JavaScript, Python-Django, MYSQL

- A resource sharing & marketplace platform with an implementation on authentication with OTP verification and a dashboard and messaging system.

Campus Social Network (2026)

Tech: HTML, Tailwind, Bootstrap, JavaScript, Python-Django REST Framework, SQLite, Alpine.js, HTMX

- D e v e l o p e d a s t u d e n t s o c i a l p l a t f o r m
- Secure Authentication and email verification
- Real time chat, Follow, Share, Live Notifications, Smart User Search functionalities.

Tamim's Photographic Gallery (2026)

Tech: React.js, Axios, CSS3, Python-Django REST Framework, SQLite, JWT-Free authentication

- Dynamic Gallery with interactive persistent liking system and a Lightbox View functionalities.

Adaptive CCTV Compression System (2026)

Tech: React, Node.js, OpenCV, FFmpeg, Python, RTSP, UDP, HTTP Networking

- Optimized video storage efficiency using compression techniques and bandwidth circulation ensuring highest ROI .

PUBLICATIONS

- **Adaptive CCTV Compression System Using Dynamic Region of Interest (ROI) Control**

  This project aims to develop an Adaptive CCTV Compression System that intelligently adjusts video compression parameters in real-time based on scene dynamics and regions of interest (ROI). The system ensures optimal video quality in important areas while minimizing bandwidth and storage usage.
